Illicit drug policies and social outcomes: a cross-country analysis

ERANID meeting, 2 March 2017, Brussels

Overview

- Aim
 - To measure the impact that different drug-related legal frameworks have on society (with a special focus on cannabis)
- Project steps
 - State-of-the-art comparative law technique (leximetrics) to compare national drug policies
 - Quantitative and qualitative study of stakeholders' perceptions of drug law (law in action)
 - Identification and analysis of key drug-related social indicators
 - Quantitative techniques to understand relationship between national drug policies and social indicators

Overview

- Scope of analysis
 - 7 countries: Portugal, France, Italy, Netherlands, England, Canada and Australia
 - Ideally over a 20-year period: 1996-2016
- Results
 - Shed further light on the impact that specific drug law characteristics may have on drug-related indicators
 - (hopefully) of value to inform policy making

The team

ADVISORS

Cláudia Costa Storti, EMCDDA
 Paul de Grauwe, LSE
 Mathias Siems, Durham University

Paris School of
 Economics, U. Paris I

Co-PI and WP leader
 Pierre Kopp

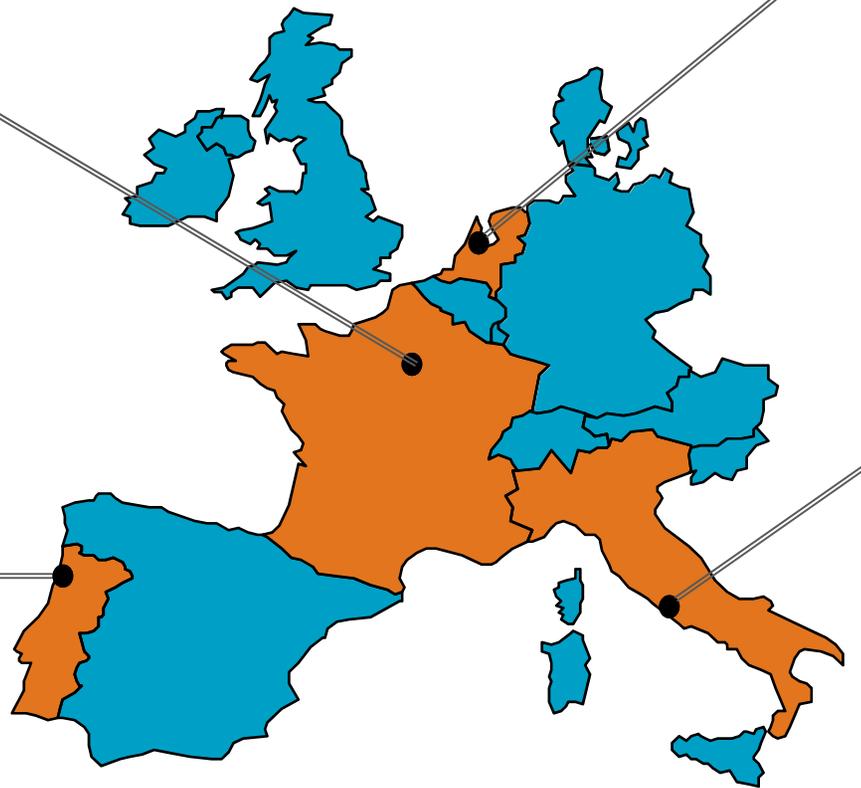

Marysia Ogrodnik

Católica Porto Business
 School, U. Católica

Dario Cirillo

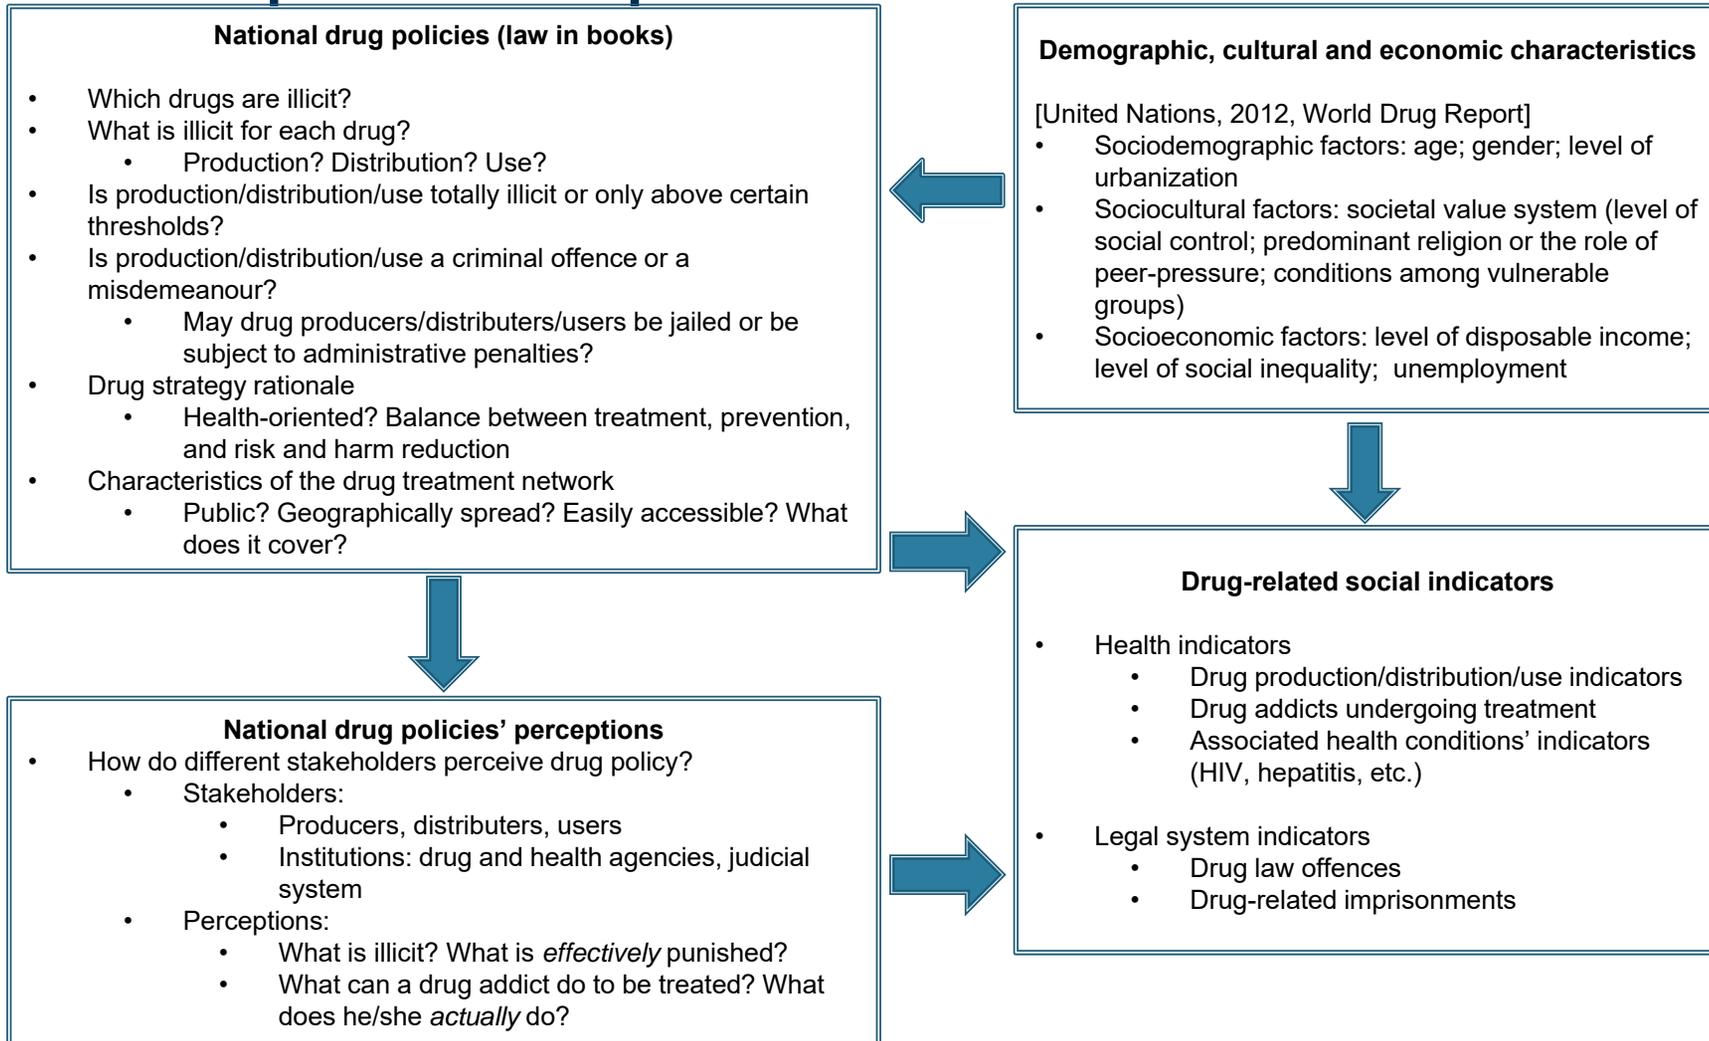

Background

- Worldwide diversity in national drug laws and policies
 - Variety of paradigms, e.g., crime-centred or health-centred
 - Reflection of each country's social, economic and cultural drivers
- Illicit drugs generate social costs
 - And yet little is known about the relationship between key drug-related indicators and the applicable drug policy framework
 - (naturally) difficult task
 - Written policy vs. policy in action vs. perceived policy
 - Each country's drug policy is unique, contextual and evolved over time

Background

- Understanding the relationship between drug policy and key social indicators is, therefore, important
 - Drug policy impacts on drug production, distribution and use
 - Results would surely inform ongoing scientific debate (especially, but not only, for cannabis)
 - But results would also help in (future) policy making

Graphical representation of rationale

Workplan

- WP1 – Coordination of the project
 - Project start-up
 - Progress meetings
 - Progress reports and final report
 - Monitoring project progress (via Skype or e-mail)

Workplan

- WP2 - Cross-country comparison of national drug policies using leximetrics
 - Leader: Ana Lourenço, Católica Porto Business School (Portugal)
 - Participants: MIPA (Italy)
 - Timing: Most of year 1, extending to year 2
 - Tasks
 - Draft guidelines for legal data collection
 - Contact official entities in the selected countries
 - Collection of legal data
 - Translation of legal documents (when needed)
 - Develop tools for preliminary legal data analysis
 - Progress report outlining main findings

Workplan

- WP3 - Qualitative and quantitative study of drug policy perceptions
 - Leader: Dirk Korf, University of Amsterdam (Netherlands)
 - Participants: Católica Porto BS (Portugal), Paris School of Economics (France), MIPA (Italy)
 - Timing: Second half of year 1; most of year 2
 - Tasks
 - Create a survey questionnaire
 - Define the sample and survey methodology in each country
 - Conduct the survey and analyse the results
 - Identify key experts in each country and conduct semi-structured interviews
 - Produce a detailed progress report with the main results

Workplan

- WP4 - Developing key social indicators for drug policy analysis
 - Leader: Pierre Kopp, Paris School of Economics (France)
 - Participants: MIPA (Italy)
 - Timing: Second half of year 1; most of year 2
 - Tasks
 - Review the literature on social indicators
 - Identify the social indicators relevant to this study
 - Maintain a regular contact with key experts or institutions in the selected countries
 - Collect, for the selected countries, data on the relevant social indicators
 - Identify problems in the data collection process or in the data
 - Produce a comprehensive database of social indicators
 - Produce a detailed progress report

Workplan

- WP5 - Assessing the impact of drug policies on key social indicators
 - Leader: Ricardo Gonçalves, Católica Porto Business School (Portugal)
 - Participants: Paris School of Economics (France), MIPA (Italy), University of Amsterdam (Netherlands)
 - Timing: Second half of year 2; most of year 3
 - Tasks
 - Carefully review the reports of WP2, WP3 and WP4
 - Analyse the database produced in WP2
 - Analyse the survey and interview results of WP3
 - Analyse the social indicators database collected in WP4
 - Identify the most suited qualitative and quantitative techniques to analyse the data
 - Quantitative analysis of drug policy impact
 - Produce a final report

Workplan

- WP6 - Knowledge building and societal dissemination
 - Leader: Católica Porto Business School (Portugal)
 - Participants: Paris School of Economics (France), MIPA (Italy), University of Amsterdam (Netherlands)
 - Timing: Second half of year 3
 - Tasks
 - Build and implement a dissemination plan
 - Organise workshops, conferences or other dissemination events
 - Contact stakeholders in the countries analysed to disseminate the results
 - Plan the scientific dissemination of the research results
 - Be available to present the research results in a variety of forums

Budget

Institution	Requested funding
Católica Porto Business School (Portugal)	€49,730
Paris School of Economics (France)	€149,430
MIPA (Italy)	€100,000
University of Amsterdam (Netherlands)	€164,390
TOTAL AMOUNT REQUESTED	€463,550

Outcomes

- By developing a method for quantitatively analysing drug policies, the project:
 - contributes to a cross-country perspective on drug policies
 - widens the field of alternative policies to consider in dealing with the drug problem in each country
 - facilitates an ex ante assessment of the impact of different policy alternatives on key social indicators
- Key actors participate in research process
 - Engagement is essential, especially for perceptions' dimension of our project

Outcomes

- Knowledge transfer into organizations in the countries involved
- Scientific articles in peer-reviewed journals, as well as lay publications
- Knowledge dissemination via workshops, conferences and other events
